

## LENScience Senior Biology Seminar Series Student Update Number 11 – May 27<sup>th</sup>, 2011

### In this issue:

- ▶ Seminar 3 Questions and challenges
- ▶ Seminar 4

### Seminar 3 — Questions

We have had great contributions to this seminar and would like to particularly congratulate the students who were on the wiki. There are extensive answers to almost all of your questions posted by the team. The final few questions will be answered in the next few days. Check [here](#) to see the questions and the responses from the team at Fertility Associates.

### Seminar 3 — Challenges

Thanks to those students who have contributed. [If you have not—check it out!](#) There are some excellent responses. The best response award will be selected later next week so there is still time to make your contribution. If you are feeling a little nervous—get your teacher to check out your answer before your post it and remember—working in a team is a really good idea. You gain from putting several minds to work on a problem and will benefit from seeing how other people think.

Congratulations to the students from Newlands College, Onehunga High School, Sacred Heart College (Auckland), Horowhenua College and Nelson College.

### Seminar 4 — The Evolving Brain: social interaction and complexity

Mark your diary - Thursday 2nd June, 3:45—5:15pm

Professor Sir Peter Gluckman and his team will bring biological and cultural evolution to life in seminar 4, exploring the evolution of the human brain, and linking this to the challenges of our modern environment.

Professor Gluckman is the Prime Minister's Chief Science Advisor.
